- Fontys University of applied science

Associated Degree of Mechanical Engineering
2017 – 2020
- Mechanical Engineering at the University of Tehran

Nodet (National Organization for Development of Exceptional Talents)
2011 - 2017
- Study at talented school in Mashhad
- Learning programming languages

WORK EXPERIENCE

Fanap Plus - Unity Developer + Backend Developer - Tehran
2020
- Unity Developer
- Backend (.Net Core) Developer
- AR Implementation
- Python with Django

First, I started with a game project in which the game engine was Unity and our target platform was Android. When the project needed a backend server, I developed a Web API with ASP.Net(Core).
After the end of the project, our next project was a web platform in which the front stack was React and the back stack was Django(REST). In this project, I was responsible for git repositories and most parts of the micros service architecture.

VARKnow Startup - C# Developer - Tehran
2019
- Game Development with Unity & C#
- AR Frameworks ex: ARCore – Vuforia – Wikitude
- VR Platforms

Center of Advanced Systems and Technology - the University of Tehran - Assistant - Tehran
2018–2019
